PROFESSIONAL SUMMARY

Results-driven Software Engineer and Cybersecurity Specialist with expertise in full-stack web and mobile development, secure software architecture, and vulnerability research. Proficient in designing scalable RESTful services, engineering secure authentication mechanisms, and optimizing backend performance using modern frameworks (React, Node.js, TypeScript, Flutter, PostgreSQL, MongoDB). Recognized for national-level cybersecurity talent development at INSA with hands-on expertise in penetration testing, log analysis, and automated security telemetry parsing.

TECHNICAL SKILLS

- **Cybersecurity & PenTesting:** Kali Linux, OWASP Web Security, Nmap, Burp Suite, Wazuh SIEM, Suricata IDS, Sysmon, Windows Event Logs, MITRE ATT&CK.
- **Languages & Core:** Python, JavaScript, TypeScript, Java (OOP/MVC), Dart, C++, PHP, Bash.
- **Web & Mobile Engineering:** React, Node.js, Express.js, MERN Stack, Flutter, Tailwind CSS, REST APIs, JWT Auth.
- **Databases & Cloud:** Neon PostgreSQL, MongoDB, Firebase Cloud Firestore, MySQL, Vercel, Render.
- **Tools & Creative:** Git/GitHub, VirtualBox, WSL2, Linux, Adobe Photoshop, Illustrator, InDesign, Canva.

PROJECTS & ENGINEERING EXPERIENCE

- **MelodyPass — Digital Music Access Platform** | *React, TypeScript, Node.js, Express, PostgreSQL, Vercel, Render*
 - [Live Application](#) • [GitHub Repository](#)
 - Architected and deployed a secure QR-code music access system serving 450+ concurrent active users, featuring 6-character cryptographic token verification and device-restricted session tracking.
 - Engineered RESTful APIs integrated with Neon cloud PostgreSQL and Render microservices, reducing payload response latency by 35% and maintaining 99.99% service uptime.
- **Penuel MKC — Enterprise Church Management System** | *MongoDB, Express.js, React, Node.js (MERN), JWT, RBAC*
 - [Live Application](#) • [GitHub Repository](#)
 - Designed and implemented an administrative platform for 8,300+ community members, incorporating granular Role-Based Access Control (RBAC) and JWT state handling to protect sensitive user records.
- **AI SOC Analyst & Pentest Copilot** | *Python, Wazuh SIEM, Sysmon, MITRE ATT&CK Framework*
 - [GitHub Repository](#)

- Developing an automated security telemetry parser that ingests Windows Event Logs and Sysmon feeds, maps threat vectors to MITRE ATT&CK tactics, and reduces SOC incident analysis overhead by 50% through AI-driven summaries.
- **Lezemer Mobile Application** | *Flutter, Dart, Firebase Firestore & Storage*
 - [GitHub Repository](#)
 - Engineered a cross-platform mobile application supporting dynamic content categorization and local SQLite/Firestore caching, delivering offline access and seamless data synchronization.
- **Lucy CTF & Security Audit Suite** | *Kali Linux, Python, Bash, Nmap, Burp Suite*
 - [GitHub Repository](#)
 - Authored custom vulnerability assessment scripts and automated network recon utilities used to audit and secure 30+ virtualized test environments.

EDUCATION & INTENSIVE TRAINING

- **Wachemo University** — *B.Sc. in Software Engineering* (Graduating 2026/27)
Relevant Coursework: Software Architecture & Design, Object-Oriented Software Engineering, Operating Systems, Database Management Systems, Computer Networks & Security.
- **INSA (Information Network Security Administration)** — *Cyber Talent National Summer Camp (5th Batch Alum)*
Competitively selected for intensive national cybersecurity program specializing in penetration testing, network defense, SOC log analysis, and malware investigation.

VERIFIED CERTIFICATIONS

- **PenTest Planning & Information Gathering** — Total Seminars (Credential ID: CSL02TSSQA94) | [Verify](#)
- **Introduction to Cybersecurity Essentials** — IBM (Credential ID: V5FVI1LK2N92) | [Verify](#)
- **Software Architecture & Object-Oriented Design** — University of Alberta (IDs: 8IUHQW1BY5BN, RKCLE1CLCPCL)
- **Client Needs & Software Requirements** — University of Alberta (ID: Z9Y1W15ZD2UV)
- **Meta Specializations:** Programming in Python (C2H1ML4R260W), JavaScript (IZHN6ZF4HSGV), Front-End Development (AVHZQIU5LFN9), Git Version Control (3PYEJOBC8400)
- **Machine Learning for All** — University of London (ID: 6IDMXIFB3209)

COMMUNITY LEADERSHIP & CREATIVE ARTS

- **Church Keyboardist & Piano Instructor (6+ Years):** Serve as lead keyboardist for weekly services and mentor youth in music theory and performance.

Digital Media & Graphic Designer: Produced event media, promotional material, and publication designs using Adobe Creative Cloud ([Design Portfolio](#)).
